

## Calgary Equity Index: Population Health Domain Score By Census Tract

The Population Health domain score is an equally weighted combination of indicators that represent the physical and mental health of Calgarians. A high domain score reflects areas with greater inequities and more health needs (such as areas with higher rates of diabetes, COPD, and fewer residents with a regular healthcare provider). A low domain score reflects areas with fewer inequities and fewer health needs (such as areas with lower rates of chronic conditions and mental health concerns). The Population Health domain score for Calgary was 41.5 in 2024.
