

## Calgary Equity Index: Accessibility and Amenities Domain Score By Census Tract

The Accessibility and Amenities domain score is an equally weighted combination of indicators that represent how easily residents can access services and amenities. A high domain score reflects areas with greater inequities and more accessibility and amenity needs (such as areas with a low Walk Score or Transit Score, and longer commute to work). A low domain score reflects areas with fewer inequities and fewer accessibility and amenity needs (such as areas that are close to schools, parks, grocery stores, and shorter commutes to work). The Accessibility and Amenities domain score for Calgary was 72.9 in 2024.
