

## Calgary Equity Index: Accessibility and Amenities Domain Score By Census Tract

The Accessibility and Amenities domain score is an equally weighted combination of indicators that represent how easily residents can access services and amenities. A high domain score reflects areas with greater inequities and more accessibility and amenity needs (such as areas with a low Walk Score or Transit Score, and longer commute to work). A low domain score reflects areas with fewer inequities and fewer accessibility and amenity needs (such as areas that are close to schools, parks, grocery stores, and shorter commutes to work). The Accessibility and Amenities domain score for Calgary was 72.9 in 2024.

## Calgary Equity Index: Activity Limitation (Relative Severity) (%) By Census Tract

This variable measures the relative severity of activity limitations among people who report having a limitation, based on data from the 2021 Federal Census. Activity limitations include challenges with vision, hearing, mobility, cognition, or mental health, and are categorized by how frequently they occur (always, often, or sometimes). The percentage reflects the severity level within the population that has an activity limitation, not the entire population of the area. A higher percentage means a greater proportion of individuals with more severe limitations. The Calgary average for this indicator was 62.4 in 2021.

## Calgary Equity Index: Climate and Environment Domain Score By Census Tract

The Climate and Environment domain score is an equally weighted combination of indicators that reflect climate risks and environmental conditions in Calgary. A high domain score reflects areas with greater inequities and more climate and environmental needs (such as areas with fewer trees, hotter temperatures, high flood risks, and more noise pollution). A low domain score reflects areas with fewer inequities and fewer climate and environmental needs (such as areas with greater tree density, lower flood risk, and more green spaces). The Climate and Environment domain score for Calgary was 54.7 in 2024.

## Calgary Equity Index: Community Belonging and Safety Domain Score By Census Tract

The Community Belonging and Safety domain score is an equally weighted combination of indicators that represent the sense of connection and overall safety of residents in their community. A high domain score reflects areas with greater inequities and more community belonging and safety need (such as areas with high crime and high mobility rates). A low domain score reflects areas with fewer inequities and fewer community belonging and safety needs (such as areas with a greater sense of connection, high voter participation rates, and low crime rates). The Community Belonging and Safety domain score for Calgary was 17.7 in 2024.

## Calgary Equity Index: Economic Dependency Ratio (Single-Parent Families) By Census Tract

The amount of government transfer payments received by single-parent families or persons not in census families, compared to their employment income. The Economic Dependency Ratio (EDR) measures how much families or individuals rely on government benefits relative to their earnings. For example, an EDR of 4.69 means that for every \$100 earned from employment, \$4.69 is received in government transfers. The Calgary average for this indicator was 34.4 in 2019.

## Calgary Equity Index: Economic Opportunity Domain Score By Census Tract

The Economic Opportunity domain score is an equally weighted combination of indicators that represent the economic well-being of Calgarians and barriers they face. A high domain score reflects areas with greater inequities and more economic needs, where residents face more significant economic challenges (such as higher income inequality and poverty). A low domain score reflects areas with fewer inequities and fewer economic needs (such as areas with higher incomes, fewer households in core housing need, and lower unemployment rates). The Economic Opportunity domain score for Calgary was 30.9 in 2024.

## Calgary Equity Index: Human and Social Wellbeing Domain Score By Census Tract

The Human and Social Wellbeing domain score is an equally weighted combination of indicators that represent the diverse social and demographic characteristics of Calgarians. A high domain score reflects areas with greater inequities and more human and social wellbeing needs (such as areas with a higher percentage of vulnerable population groups and lower levels of education). A low domain score reflects areas with fewer inequities and fewer human and social wellbeing needs (such as areas with fewer vulnerable population groups and residents with higher levels of education). The Human and Social Wellbeing domain score for Calgary was 28.9 in 2024.

## Calgary Equity Index: Income Inequality Ratio (P90/P10) By Census Tract

This ratio measures income inequality by comparing the income of households at the 90th and 10th percentiles of after-tax income. The 90th percentile is the income level where 90% of households earn less, and the 10th percentile is where 10% of households earn less. A higher P90/P10 ratio means a larger gap between high and low incomes, indicating greater income inequality. The Calgary average for this indicator was 4 in 2021.

## Calgary Equity Index: Population Health Domain Score By Census Tract

The Population Health domain score is an equally weighted combination of indicators that represent the physical and mental health of Calgarians. A high domain score reflects areas with greater inequities and more health needs (such as areas with higher rates of diabetes, COPD, and fewer residents with a regular healthcare provider). A low domain score reflects areas with fewer inequities and fewer health needs (such as areas with lower rates of chronic conditions and mental health concerns). The Population Health domain score for Calgary was 41.5 in 2024.
